Project

E Commerce Website

[project1_link](#)

Technologies used : HTML, CSS, Bootstrap

A responsive website that lets you browse through an extensive range of products with ease.

- Built with a mobile-first approach, this website features HTML structure elements and Bootstrap components to ensure seamless navigation.
- Get a clear view of the products with product videos and a carousel displaying multiple images of offers.

Food Munch

[project2_link](#)

Technologies used : HTML, CSS, Bootstrap

A fully responsive website that offers a comprehensive list of food items and detailed information about each item.

- Designed to provide the best user experience with HTML structure elements and Bootstrap components.

- Implemented product videos to give customers a clear view of the food items.

Wikipedia Search Application

[project3_link](#)

Technologies used : HTML, CSS, JS, REST API Calls, Bootstrap

Unlock the vast wealth of knowledge on Wikipedia with a custom search application that delivers relevant and curated results. Quick and easy access to information has never been easier.

- Beautifully presented search results with HTML list elements, styled with CSS, Bootstrap, and a responsive design that adapts to any device.
- Seamlessly access information with the power of asynchronous fetch GET HTTP API calls and the ability to open the desired result in a new tab for further reading.

GenAI Chatbot

[project4_link](#)

Technologies used : AI Applications

Introducing my debut AI chatbot project! With a passion for innovation, I've crafted an interactive virtual assistant that's here to engage, assist, and learn from our conversations. Get ready to explore the future of AI-driven communication!
